TRADE COOPERATION BETWEEN KAZAKHSTAN AND CHINA: RECENT TRENDS AND FUTURE PERSPECTIVES

In August 30, 2015 President Nursultan Nazarbayev paid an official visit to China to take part in the celebration of the 70th anniversary of the Victory in the Pacific Day. Apart from discussing current issues of mutual interest, the two leaders discussed new opportunities of bilateral trade. The visit ended on September 3 when Nursultan Nazarbayev and 30 foreign government officials and heads of state participated in the military parade in Beijing dedicated to the 70th anniversary of Chinese People’s War of Resistance against Japanese Aggression and the end of the World War II. Although the two leaders tackled certain political and historical issues, the prevalence of the economic agenda was evident. Nursultan Nazarbayev also attended a meeting with heads of the largest Chinese companies like Xinhua, CITIC Group, Huawei Technologies, Sinopec Group, CNPC, China Investment Corporation as well as China Development Bank, Export-Import Bank of China, Multilateral Temporary Secretariat of the Asian Infrastructure Investment Bank, Silk Road Foundation.

It is noteworthy that Kazakhstan decided to involve large Chinese companies in many state projects like Nurly Zhol and Astana EXPO-2017. One of the most crucial issues for Kazakhstan is the industrial and innovative development. The two sides signed a Memorandum of Understanding on cooperation between the JSC National Agency for Export and Investment KAZNEX INVEST and Silk Road Fund on establishment of a special investment fund for the industrial-innovative projects of cooperation. A special attention was paid to the development of the transit corridor along the New Silk Road initiative and other joint infrastructural projects. Particularly, the Kazakh national holding company “Bayterek” and the state Chinese investment company CITIC Group reached an agreement to participate in the Kazakhstan Infrastructure Fund, which will spend not less than $300 million on the realization of various infrastructural projects in Kazakhstan.

The two countries will cooperate further in the extractive sector. In this context, the two sides signed the “Framework Loan Agreement between the LLP Masalskoe Mining and Processing Plant and the Export-Import Bank of China” and the “Framework Agreement between Eurasian Resources Group Corporation and the State Development Bank of China”. Besides, several other investment projects with CNPC are in process in the extractive industry including development of Kashagan oil field, modernization of the Shymkent Oil Refinery, construction of the gas pipeline Beyneu-Bozoy, etc.

Totally, 45 projects will be realized in the near future concerning various industries in Kazakhstan. The contracts on 25 projects were signed totaling $23 billion. These joint projects are planned to last at least 3-4 years. Such close economic cooperation was clearly a result of recent changes in the oil market and the economic crisis in Russia, Kazakhstan’s most important trade partner. In fact, the trade with Russia has been steadily falling since 2013. During the first half of 2015, it decreased by more than 20% compared to the same period of 2014. The sharp depreciation of rouble made Kazakh exports to Russia less competitive. As a result, tenge depreciated by nearly 50%. Moreover, low oil prices and uncertainties about their future hinder the growth of the national economy. Close economic integration with Russia that was boosted during recent years in the framework of the Eurasian Economic Union (EEU) makes it difficult to stimulate trade with other countries because the trade tariffs with countries outside the EEU are set by the Eurasian Economic Commission. As a result, Kazakhstan had to search for new investment opportunities outside the EEU.

China has been Kazakhstan’s second most important trade partner. In 2014 trade with China accounted for $17.156 billion which was 14.2% of the total trade of Kazakhstan with other countries, whereas trade with Russia was 16.7%. Over the years, the share of the trade with China has gotten closer to the share of trade with Russia.

In conclusion, this visit certainly marks a new level of economic relationships between Kazakhstan and China. Contracts that were signed during this visit imply many long-term projects aiming at closer economic cooperation. The intention for future cooperation was also summarized in the “Joint Declaration on a new Stage of Comprehensive Strategic Partnership”. In this sense, a closer trade cooperation between Kazakhstan and China seems to bring new opportunities for Kazakhstan in both domestic and foreign balances.
Politics, Foreign Affairs and Security

- The President of Azerbaijan, Ilham Aliyev, the President of Kazakhstan, Nursultan Nazarbayev, the President of Kyrgyzstan, Almazbek Atambayev, the Chairman of the Grand National Assembly of Turkey, Ismet Yilmaz, and the Deputy Prime Minister of Turkmenistan, Sapardurdy Toylyev, attended the V Summit of the Cooperation Council of Turkic Speaking States in Astana. The Declaration of the V Summit was signed and issues related to the spheres of culture, education and economy were discussed. Moreover, the Protocol of bilateral cooperation in media and information among the member-countries of the Turkic Council and a Memorandum of Understanding among the official news agencies and national TV channels were signed.
